Informatics Engineering graduate from Institut Teknologi Sumatera (ITERA) with experience building React/Laravel web systems, documenting workflows, testing features, and coordinating technical tasks. Targeting an Engineer Intern role at PT Transportasi Jakarta to support mentor-directed feature development, unit testing, bug fixing, technical documentation, and Agile team routines.

EDUCATION

Institut Teknologi Sumatera - Lampung Selatan, Indonesia

Aug 2022 - Jul 2025

Bachelor of Informatics Engineering, GPA: 3.56/4.00 (Graduated 3 July 2025)

- Thesis: "Development of the Student Affairs Subsystem for FTI ITERA Harmony Web Using Rational Unified Process (RUP) Method and Kanban Tools."
- Evidence:** repo.itera.ac.id/depan/submission/SB2606220028
- Relevant focus: software development, web development, database systems, software testing, machine learning, data analysis, and project management fundamentals.

WORK EXPERIENCE

FTI ITERA - Lampung Selatan, Indonesia

2025 - 2026

Full Stack Developer, Website Harmony (Independent Study / MBKM)

- Developed the Student Affairs correspondence subsystem using React, Laravel, and MySQL; organized analysis, implementation, and documentation with RUP stages and Kanban task tracking.
- Measured impact: reduced letter-processing turnaround from 7-10 to 2-5 working days, achieved 100% black-box test pass rate, and reached 88.57% UAT score.
- Evidence:** [thesis repository](#); harmony.fti.itera.ac.id

Kominfo Kota Bandar Lampung - Bandar Lampung, Indonesia

2025

Web Developer & Staff, Information Security and Cyber Division (Internship / MBKM)

- Worked on 2 government web systems: SIMAS for inter-agency letter validation and SIMAMANG for online internship registration.
- Implemented feature flows for account creation, document upload, status tracking, multi-tenant data organization, and centralized recap using Laravel, Inertia.js, and React.js.
- Evidence:** simas.bandarlampungkota.go.id; simamang.bandarlampungkota.go.id

Institut Teknologi Sumatera - Lampung Selatan, Indonesia

2023 - 2025

Teaching & Laboratory Assistant / Coordinator

- Assisted and coordinated practicum/course delivery across 8+ courses, including Basic Physics Practicum I & II, Introduction to Computer and Software, Software Engineering Fundamentals, and Formal Language and Automata Theory.
- Coordinated Basic Physics Practicum assistant teams for 3 semesters; managed schedules, task allocation, grade recap, student evaluation, and academic documentation.
- Evidence:** [Teaching Assistant documents folder](#)

ORGANIZATIONAL AND LEADERSHIP EXPERIENCE

HMIF ITERA - Expert Staff, Member Development Division

2025

- Supported 1 member-development division by helping coordinate student development initiatives, communication flow, and program execution.

HMIF ITERA - Speaker, MBKM Sharing Session

2025

- Delivered 1 MBKM sharing session to explain independent-study and internship pathways for Informatics students.

HMIF ITERA - Staff, Training and Professional Development Division

2024

- Contributed to 1 training/professional-development division through team-based planning and execution of student development activities.

Campus Event Medical Staff - ITERA Olympic & PPLK ITERA

2023 & 2025

- Supported medical readiness and participant safety coverage in 2 campus-level events: PPLK ITERA 2023 and ITERA Olympic 2025.

TRAINING

DBS Foundation x Dicoding - Indonesia	2025
<i>Coding Camp 2025, Machine Learning Engineer Learning Path</i>	
- Completed structured training across 6 technical areas: Python, data analysis, data processing, machine learning, deep learning fundamentals, and MLOps. - Produced project submissions and collaborated in team-based learning, strengthening documentation, problem solving, time management, and English communication. Evidence: certificates folder	

Telkom Indonesia - Indonesia	Jul 2024 - Sep 2024
<i>Digistar Class 2024, Hacker (Front-End)</i>	
- Completed a 3-month front-end development program focused on responsive React-based interfaces and feature implementation. - Developed interactive web features with peers, improving UI implementation, collaboration, and adaptability. Evidence: certificates folder	

PROJECT

Web Harmony - Campus Correspondence System	React, Laravel, MySQL
- Built student-affairs letter administration features, workflow documentation, and validation support for FTI ITERA Harmony Web. Impact & evidence: 7-10 days reduced to 2-5 days; 100% black-box pass; 88.57% UAT; live system	
SIMAS - Inter-agency Letter Management System	Laravel, Inertia.js, React.js
- Designed a multi-tenant architecture and centralized recap workflow for government letter validation across agencies. Evidence: simas.bandarlampungkota.go.id; measured scope: 1 multi-tenant web system.	
SIMAMANG - Internship Registration Portal	Laravel, React.js
- Developed account creation, document upload, and application-status tracking for online internship registration. Evidence: simamang.bandarlampungkota.go.id; measured scope: 3 core applicant features.	
End-to-End ETL Pipeline	Python, Pytest, PostgreSQL, Google Sheets API
- Extracted product data from 50 web pages, transformed it, and loaded the output into 3 destinations: CSV, Google Sheets, and PostgreSQL. Evidence: GitHub repository; added Pytest-based tests to verify pipeline behavior.	
CI/CD Pipeline for ML Model	GitHub Actions, MLflow, Docker
- Automated 4 delivery steps: model training, MLflow experiment tracking, Docker image build, and Docker Hub publishing through GitHub Actions. Evidence: GitHub repository	

CERTIFICATION

Evidence: Google Drive certificates folder
2026: Prompt Engineering for Software Developers; Building Machine Learning Systems; Machine Learning Operations (MLOps); Applied Data Science with Microsoft Fabric.
2025: Applied Machine Learning; Data Analysis with Python; SQL Fundamentals; Git & GitHub Fundamentals; JavaScript Programming Fundamentals; SOLID Programming Principles.
2024: Project Management Fundamentals; Beginner Back-End Development with JavaScript; Cloud Practitioner Essentials (AWS Cloud Fundamentals).

SKILLS

Hard Skills: React.js, Laravel, Inertia.js, MySQL, RESTful web systems, SQL, JavaScript, Python, Pytest, Git/GitHub, GitHub Actions, Docker, technical documentation, data analysis, and machine learning.
Engineering Practices: feature implementation, bug fixing, black-box testing, UAT support, unit testing basics, Kanban task tracking, and Agile collaboration.
Soft Skills: communication, teamwork, time management, public speaking, problem solving, adaptability, and attention to detail.

LANGUAGE

Bahasa Indonesia: Native. English: Limited Working Proficiency.
