Fresh Informatics Engineering graduate from Institut Teknologi Sumatera with hands-on experience in full-stack web development, data processing, machine learning, and project coordination. Built React, Laravel, and MySQL systems for campus and government workflows, with a strong habit of documenting requirements, testing results, and stakeholder decisions.

EDUCATION

Institut Teknologi Sumatera — South Lampung, Indonesia

2022 – 2026

Bachelor of Informatics Engineering, GPA: 3.56/4.00

- Thesis: Development of the Student Affairs Subsystem for FTI ITERA Harmony Web using Rational Unified Process (RUP) and Kanban tools. Repository: repo.itera.ac.id/depan/submission/SB2606220028.

WORK EXPERIENCE

Faculty of Industrial Technology, ITERA — South Lampung, Indonesia

2025 – 2026

Full Stack Developer, Website Harmony FTI (Independent Study / MBKM)

- Developed a student-affairs correspondence subsystem using React, Laravel, and MySQL; organized delivery through RUP phases and Kanban task tracking.
- Reduced campus letter-processing time from 7–10 to 2–5 working days, achieved a 100% black-box test pass rate, and reached an 88.57% UAT score.

Dinas Kominfo Kota Bandar Lampung — Bandar Lampung, Indonesia

2025

Web Developer & Staff, Information Security and Cyber Division (Internship / MBKM)

- Contributed to SIMAS and SIMAMANG, government web systems for inter-agency letter validation, centralized recap, and online internship registration.
- Implemented account creation, document upload, application-status tracking, and multi-tenant data organization using Laravel, Inertia.js, React.js, and MySQL.

Institut Teknologi Sumatera — South Lampung, Indonesia

2023 – 2025

Teaching & Laboratory Assistant / Assistant Coordinator

- Handled assistant and coordinator assignments across 10+ courses/practicums, including Basic Physics, Introduction to Computer and Software, Software Engineering Fundamentals, and Formal Languages and Automata.

DBS Foundation x Dicoding — Indonesia

2025

Machine Learning Engineer Cohort, Coding Camp 2025 (Independent Study / MBKM)

- Completed structured training in Python, data analysis, machine learning, deep learning fundamentals, MLOps, and project-based model evaluation.
- Built CashEye, a computer vision application that detects Indonesian Rupiah denominations from images and returns audio feedback.

SELECTED PROJECTS

Web Harmony — Campus Correspondence System

React, Laravel, MySQL

- Built student-affairs workflows; reduced processing time from 7–10 to 2–5 working days with 100% black-box testing and 88.57% UAT.

SIMAS and SIMAMANG — Government Digital Systems

Laravel, Inertia.js, React.js

- Supported letter-validation and internship-registration modules covering multi-tenant records, document upload, status tracking, and centralized reporting.

End-to-End ETL Pipeline

Python, Pytest, PostgreSQL

- Extracted product data from 50 pages, transformed it, and loaded outputs into CSV, Google Sheets API, and PostgreSQL with Pytest-based validation.

“Access by KAI” Sentiment Analysis

Python, TF-IDF, XGBoost

- Scraped and cleaned Google Play reviews, trained Logistic Regression, XGBoost, and Naive Bayes models, with XGBoost achieving 97% accuracy.

Afenter_PCD — Motorcycle Parking Area Detection

Python, Streamlit, OpenCV

- Built an 11-stage image-processing pipeline for parking-slot segmentation and occupancy analysis from uploaded images.

ORGANIZATIONAL AND EVENT EXPERIENCE

- Informatics Student Association (HMIF) ITERA — South Lampung, Indonesia

2024 – 2025
- Expert Staff, Member Development Division / Professional Training Staff / MBKM Sharing Session Speaker

- Supported student-development initiatives, professional-training programs, member communication, and event execution within the Informatics student community.
 - Delivered an MBKM sharing session for Informatics students and helped prepare materials, documentation, and coordination flow for student-facing activities.

CERTIFICATIONS AND TRAINING

- 2026:** Prompt Engineering for Software Developers; Building Machine Learning Systems; Applied Data Science with Microsoft Fabric; Generative AI with Microsoft Azure; MLOps.
- 2025:** Applied Machine Learning; Machine Learning Development; Python Data Analysis; SQL Fundamentals; Git/GitHub; JavaScript; SOLID; RevoU Intro to Data Analytics; DFIR Foundations.
- 2024:** Project Management Fundamentals; Beginner Back-End Development with JavaScript; Java, C, and AWS Cloud Practitioner Essentials.
- Evidence:** [Google Drive certificates folder](#).

SKILLS

Technical	: React.js, Laravel, Inertia.js, MySQL, REST APIs, JavaScript, PHP, Python, Pandas, Scikit-learn, TensorFlow, PyTorch, OpenCV, Streamlit, Git/GitHub, Docker, GitHub Actions, MLflow
Practices	: RUP, Kanban, requirements gathering, technical documentation, black-box testing, UAT support, Pytest, data cleaning, model evaluation, stakeholder communication
Soft Skills	: Communication, teamwork, time management, public speaking, problem solving, adaptability, attention to detail
Achievements	: Cum Laude graduate from ITERA (2026); PHMW 2024 grant recipient; 30+ technology and professional certifications
Languages	: Indonesian (Native), English (Limited Working Proficiency)
